Baccarat

The goal

The goal of Baccarat is to obtain a hand with a total value closest to 9.

How to play the game

If the selected game is loaded, a money-slider will be shown. Drag the slider to the amount you want to play with and click on "PAY IN". In the game, place a bet on the Player and/or the Banker and/or a Tie and press the deal button. Both the Player and the Banker are dealt two cards. Ace counts as one, the cards 2 through 9 as their face value and King, Queen, Jack or 10 as 0. If the total value of the hand is higher than 9, the first digit is ignored. For example: 9 + 7 = 16 is in Baccarat 6 and 5 + 5 = 10 is in Baccarat 0. If either the Player and/or the Banker has a total value of the first two cards of 8 or 9, they both stand. This rule overrides all other rules. Otherwise the Player and/or the Banker will automatically be dealt a third card according the third card rules. If the total value of the Player is closer to 9 than the Banker, the Player wins. If the total value of the Banker is closer to 9 than the Player, the Banker wins. If the Player and the Banker have the same total value neither wins but a bet on Tie is paid out 8:1.

European Blackjack

The goal

The goal of the game is to get as close as possible to 21 points, by taking additional cards if needed and without going over 21.

How to play the game

If the selected game is loaded, a money-slider will be shown. Drag the slider to the amount you want to play with and click on "PAY IN". At the beginning of the game, each active hand is dealt two cards. The dealer receives only one card. Cards have the value of the number that is displayed on them. Face cards (Jack, Queen and King) are valued 10 points and the Ace card can be either 1 or 11 points. Try to beat the dealer with a set of higher cards. When your point total is closer to 21 than the dealer's hand, you win. The payout is 1:1. If you have the same number of points as the dealer has, it is a draw (called "Push") and your bet is returned to you. If your hand is over 21 (called "Bust"), or if the dealer's point total is higher than yours, the dealer wins. If the first two cards show 21 points (Ace + 10 valued card), the hand is called Blackjack. If your hand and the dealer's hand are both Blackjack, it is a draw. Your winning Blackjack hand is paid 3:2. Blackjack beats 21.

Strategy

The following features are available, depending on the actual situation in the game, to enhance your game strategy:

- Insurance: If the dealer's first card is an Ace, you can insure your bet against the dealer having Blackjack.
- Double-down: If your hand's first 2 cards show a value of 9, 10 or 11, you can double your bet and just one more card is dealt to that hand.
- Split: If the first 2 cards of your hand are of the same value, you can split your hand into two separate hands and draw additional cards per hand trying to reach 21. If you split 2 Aces, only one card per hand is drawn.
- Even Money: If your hand is Blackjack and the dealer's first card is an Ace, the option 'even money' is offered. If accepted, the bet is doubled to you and the hand is finished.

Game specification

European Blackjack is offered in 3 versions:

- Low bet version: minimum bet per hand: 0,10 ,maximum bet per hand: 5,-.
- Standard bet version: minimum bet per hand: 1,- ,maximum bet per hand: 25,-.
- High bet version: minimum bet per hand: 25,- ,maximum bet per hand: 500,-.

European Roulette

The goal

In European Roulette, you can make bets to where the ball will land on the spinning Roulette wheel after it being released.

How to play the game

If the selected game is loaded, a money-slider will be shown. Drag the slider to the amount you want to play with and click on "PAY IN". In the game, place a bet, or multiple bets, on a number or betting area on the Roulette table and press the spin button. The number the ball lands on in the Roulette wheel is the winning number. When your bet includes this number you win.

Strategy

There are a number of different ways to place a bet: betting on a single number, multiple numbers, odd/even or red/black:

- Straight up bet: Place your bet on each number individually (including zero).
- Split bet: Place your bet on the line between two numbers (e.g. 11&12).
- Street bet: Place your chips on the lower edge of the board at the end of the corresponding street.
- Corner bet: Place your chips at the cross where four numbers meet. The bet is thus on four numbers.
- Four bet: Place your chips at the lower edge of the board, at the end of the line between zero and the first row. The bet is on numbers 0, 1, 2 and 3.
- Line bet: Bet on six numbers. Place your chip at the T-section where two street meet.
- Column bet: Bet on 12 numbers. Place your chips on any of the three horizontal lines, indicated 2 to 1.
- Dozen bet: Bet on 12 numbers. Place your chips on one of the three boxes marked "1st 12", "2nd 12" or "3rd 12".
- Red/Black: Bet on an outcome of either red or black. Zero is a losing number.
- Even/Odd: Bet on an outcome of an even or odd number. Zero is a losing number.
- Low/High: Bet on a result that is either a number between 1-18 or 19-36. Zero is a losing number.

On the 'racetrack', that duplicates the Roulette wheel, are a number of fixed bet options. The payout and details on the racetrack bets can be found in the helppage of the game.

Game specification

European Roulette is offered in 3 versions:

- Low bet version: minimum bet: 0,10. Table maximum is 50,-.
- Standard bet version: minimum bet: 1,-. Table maximum is 500,-.
- High bet version: minimum bet: 5,-. Table maximum is: 2 500,-.

Punto Banco

The goal

The goal of Punto Banco is to obtain a hand with a total value closest to 9.

How to play the game

If the selected game is loaded, a money-slider will be shown. Drag the slider to the amount you want to play with and click on "PAY IN". In the game, place a bet, or multiple bets, on the Punto and/or Banco and/or Egalité and press the deal button. Both Punto and Banco are dealt two cards. Ace counts as one, the cards 2 through 9 as their face value and King, Queen, Jack or 10 as 0. If the total value of the hand is higher than 9, the first digit is ignored. For example: 9 + 7 = 16 is in Punto Banco 6 and 5 + 5 = 10 is in Punto Banco 0. If either Punto and/or Banco has a total value of the first two cards of 8 or 9, they both stand.
